

## DN2200 Bellows Inconel 625 with weld ends and insulation

**Service:** Eliminate effect of pressure and vibrations

<b>Pressure range:</b> 3.5 BarG	<b>Medium:</b> Air
<b>Temperature:</b> 300°C	<b>Country of installation:</b> Germany
<b>Movements:</b> Axial	<b>Country of placing the order:</b> Germany
<b>Dimension:</b> DN2200	

### Description of application:

Replacement of a bellows in a steelwork. KE-Burgmann Bredan engineers designs a DN2200 one layer bellows with a 15° fase - see picture above. This welding is devopled by one of the worlds wellknown steelwork engineering companies in Germany and is used in steelworks all over the world.

Bellows material : Inconel 625  
 Weld ends : EN 2.4605  
 Sleeve : EN 1.4828  
 Insulating: 12 mm

**KE-Burgmann Bredan keep a varied range of special bellows material and insulation materials in stock. Please contact us for further information.**
